Introduction to the **IDEXX 'Faecal Parasitology'** Laboratory Training Course - Lisburn

The IDEXX 'Faecal Parasitology' session is a half-day session designed to help you know and understand the techniques for sample collection and in-house analysis of faeces for identifying faecal parasites. It is a practical based course and you will be provided with comprehensive course notes and study aids to support the practical skills learned. The course is designed to be useful in techniques used for dogs & cats, reptiles, equines and livestock. Theory will cover all species listed, practical identification will be subject to availability of positive samples that week.:

This course will take place at:

VSSCO,
29 Enterprise
Crescent, Lisburn
BT28 2BP

J

Faecal Analysis

- ▶ Understand how to collect and prepare faecal samples for in-house or reference lab examination
- ▶ Carry out microbiology techniques:
 - Faecal flotation technique for worm egg identification in companion animal, and reptile samples.
 - Modified McMasters technique for worm egg counts using a counting chamber in equine and livestock samples.
 - Use of stains for enhancing appearance of worm ova/protozoa
- ▶ The preparation and use of a microscope
- ▶ Examine fixed slides of some of the faecal parasites commonly found in faeces

The course has been structured so that the time spent on practical sessions is maximised. Course numbers are kept to a maximum of 6 to ensure personal hands on training. Additional information is covered in the course notes. **Please come dressed appropriately for a practical course where you will be handling faeces.**

The course also includes:

- ▶ **Comprehensive course notes and study aids for you to keep**
- ▶ **A certificate of attendance**
