Introduction to the **IDEXX Haematology & Urinalysis** Laboratory Training Course

The IDEXX Laboratory Training Course compliments the syllabus for the Laboratory section of the Level 3 Diploma in Veterinary Nursing, while being in-house friendly and realistic. It is a practical based course and you will be provided with comprehensive course notes and study aids to support the practical skills learned.

The course has been divided into two sections:

Practical Haematology

- ▶ Understand how to collect and prepare blood specimens for haematology
- ▶ The preparation and use of a microscope
- ▶ Basic microscopy techniques including the identification of white cells, red cells and platelets, including individual white cell lines and mature and immature red cells, the preparation and staining of good quality blood smears for morphological examination
- ▶ Discussion of importance of PCV results using microhaematocrit tubes
- ▶ Recognition of the presence of immature red blood cells in anaemia.

The course has been structured so that the time spent on practical sessions is maximised. Course numbers are kept to a maximum of 6 to ensure personal hands on training. Additional information is covered in the course notes.

The course also includes:

- ▶ Comprehensive course notes and study aids for you to keep
- ▶ A certificate of attendance

Please return this form to:

IDEXX Laboratories Wetherby
Grange House, Wetherby
West Yorkshire LS22 7DN

Or email to samantha-tanfield@idexx.com

This course will take place at:

VSSCO,
29 Enterprise
Crescent,
Lisburn
BT28 2BP

Practical Urinalysis

- ▶ Understand how to collect and prepare urine samples for in-house examination and lab microbiology
- ▶ Basic microbiology techniques including the examination of urine samples using wet slides and discuss use of dry slides and stains
- ▶ Recognition of urine sediment, including crystals and cells
